

# HEALTH CO-OP STUDENTS

COLLABORATIVE | CURIOUS | INFORMED

## ACADEMICS

This professional program takes an interdisciplinary approach to health and draws on scientific, social, and humanistic knowledge. Students will embark on a path that will help them discover that health is about more than not being sick, that how we think about health has changed, and that much of health is determined by factors outside of ourselves and our physiology. Students have the opportunity to study biomedical or social determinants and health equity fields. Students are interested in pursuing careers in health-related fields, including health policy, health advocacy, pharmaceutical sales, health management, or health research.
